

Material & Personnel Lifting Devices – Engineering – Design – Fabrication

# Lifting Devices

Our steel fabrication division features an in-house engineering team with years of industry experience, the latest design technologies and highest quality fabrication techniques ready to design your custom lifting devices. This team produces our line of BLP Ultra™ Lifting Devices, as well as the BLP UltraRider™ and BLP MaxiRider™ personnel hoists. All BLP Ultra™ lifting devices are inspected and tested, with certs available on [www.prooftesting.com](http://www.prooftesting.com).

## Engineering & Design

Bishop Lifting Products, Inc. deploys an experienced in-house engineering and design team that utilizes CAD, 3D modeling, and FEA programs. We are lifting equipment design specialists geared specifically for custom lifting devices. We design and fabricate custom lifting devices according to the ASME BTH-1 design standard, utilizing our years of field-validated industry experience, modern electronic design and analysis tools.

## Lifting Devices

BLP has been fabricating lifting devices for over a decade. We were the first company in Texas dedicated to satisfying the demands of heavy industry. We offer our line of BLP Ultra™ Lifting Devices for custom and standard applications. Our fabrication areas of expertise include spreader bars, lifting beams, material baskets, personnel platforms, drum and bottle lifters, pallet lifters, forklift adapters, jib cranes, lifting lugs, material handling equipment, and rigging appliances. BLP Ultra™ Lifting Devices are built to meet or exceed ASME B30.20 "Below the Hook Lifting Devices" Standards.
